

Ditec Globe 6

The perfect automation
for your home garage

EN

Make your life comfortable and easy!

Ideal for your sectional overhead door and your up and over door with springs

Simplicity never goes out of fashion

The new Ditec Globe 6 operator for residential sectional overhead doors is the true simple, quick and low-cost solution for automatic small and medium-sized garages.

With a smart, neutral look, it can be installed in any environment without being intrusive. Thanks to the DO IT kit, the components are ready for installation and use, both for typical sectional overhead doors and for up and over doors with springs.

- Ready and easy to install on the spot
- A strong solution for basic applications
- Perfect dynamic control via encoder
- Easy operation via transmitter
- Ready to use DO IT kit at a competitive price

- Power supply 230 VAC 50/60 Hz
- Gearmotor 24 VDC
- Thrust: 550 N
- Max door surface: 7 sqm
- Max door height: 2.3 m
- Chain traction, operational speed: 0.1 m/s
- Service class 2 - light application
- Complies with Directives LVD, MD, EMCD
